

FOLKESTONE HARBOUR
COMPANY LIMITED

NOTICE TO MARINERS
No 4 of 2017

**Dredging works to outer harbour (Between
East Head structure and Viaduct)**

All port users should be aware that Dredging works will be taking place between the 20th of February 2017 and 15th May 2017.

During this period there will be dredging activities being undertaken by land based plant 3 hours before and 3 hours after low water.

As part of the dredging process material will be stockpiled at the south Quay wall local to the Heavy lift berth. This material will be removed each night and therefore no obstructions should be present for Mariners. In the event that material cannot be removed as planned and a stockpile of deviation in the bed levels is likely the affected area will be marked with yellow buoys.

Please contact the harbour manager should you have any queries regarding this.

Date: 17th February 2017
