FOLKESTONE HARBOUR
COMPANY LIMITED

NOTICE TO MARINERS No 4 of 2021

SOFT MUD/SAND IN OUTER HARBOUR

A recent inspection of the outer harbour has highlighted the need for harbour users to exercise extreme caution when accessing their craft at low water.

Extensive areas of deep soft mud are to be found in the outer harbour particularly, but not exclusively, in the area used for mooring commercial fishing vessels.

In addition, obstructions including boulders and items thrown from the Stade litter the area.

It is impractical to remove all this debris from the outer harbour and so this Notice to Mariners is issued as a warning to harbour users of the hazards that may be encountered underfoot when accessing craft moored in the outer harbour.

Date:
1st April 2021

Folkestone Harbour Company Limited
